To whom it may concern

Dear Sir/Madam

Re: b-pure Purification System

We at Omega, Check2Fly, COVID-19 Laboratories, have installed the Biopharmax b-pure Air and Surface purification units at our laboratories.

To this date we are pleased with the performance of the system. As managers, we believe it is of great importance taking care of our employees' health by taking such action to reduce risk of contamination. The employees feel safe and comfortable at their work place, especially when directly handling COVID-19 suspected samples.

I would recommend using this system to others.

Respectfully,

Shay Gabbay 
Procurement Manager
